

# EMERGENCY ROOM VS URGENT CARE

## How to Make the Right Choice

Making the right choice on where to receive care can save your life, save time and is cost effective.

### REASONS TO GO:

- ✓ Signs of a heart attack, including chest pain
- ✓ Signs of a stroke, onset of numbness in the arms or legs, slurred speech or facial drooping
- ✓ Severe shortness of breath
- ✓ Poisoning
- ✓ Major life or limb threatening injuries
- ✓ Severe wounds and amputations
- ✓ Coughing up or vomiting blood
- ✓ Suicidal or homicidal feelings

*Emergency rooms specialize in managing catastrophic illnesses and trauma injuries.*

### REASONS TO GO:

- ✓ Fever without rash
- ✓ Ear pain
- ✓ Painful urination/UTI
- ✓ Persistent diarrhea
- ✓ Sore throat
- ✓ Vomiting
- ✓ Minor injury such as a common sprain or shallow cut
- ✓ Minor burns
- ✓ Broken bones
- ✓ Stomach pain

*An urgent care is a convenient option if your regular physician is unavailable or unable to offer a timely appointment. Or, when illness strikes outside of regular office hours.*

## When to Call 9.1.1.

If symptoms arise suddenly and you believe that a life is in jeopardy, call 9.1.1. Calling 9.1.1. allows emergency medical services to begin lifesaving treatment upon arrival and to continue while en route to the hospital.
